EDUCATION

Masters of Science in Computer Science & Engineering August 2022 - May 2024
Arizona State University, Tempe, USA 4/4
Coursework: Cloud Computing, Distributed Database Systems, Computer Vision, Data visualization

Bachelor of Technology in Computer Science & Engineering July 2017 - May 2021
Dharmsinh Desai University, Nadiad, India 3.8/4
Coursework: Data Structure & Algorithms, Big Data Analysis, Software Engineering

SKILLS

Languages: C#, Python, C++, JavaScript, SQL, JAVA, TypeScript, Matlab
Frameworks: LangChain, Langflow, PyTorch, Serverless Framework, Express, Node.js, .Net, Kafka, Angular, Django, Selenium, React Native, React, Flask, D3, Jasmine, TensorFlow, Keras, Scikit-learn, Hugging Face Transformers
Cloud: Azure, AWS, Google cloud(GCP)
Other: Docker, PostgreSQL, MySQL, MongoDB, Jenkins, CI/CD, Jira, Kubernetes, Agentic AI, Octopus, MCP

EXPERIENCE

Amazon, Software Development Engineer, Seattle WA, USA December 2024 - Present
Tech Stack: AWS, Java, Python, Microservices, DynamoDB, Lambda, SparkSQL
- Architected a sampling module, reducing manual effort from 1 week to 4 hours via AWS workflows
- Built an LLM annotation pipeline with human-in-loop, cutting labeling latency from 3 weeks to 2 day
- Automated end-to-end model training and error analysis, accelerating overall experimentation cycles
- Deployed **deferrable operators** replacing Lambda polling; increased concurrency and cut costs by **20%**.
- Boosted throughput by **40%** and cut costs by eliminating idle compute via asynchronous execution.
- Executed regional migrations with 100% uptime and zero production incidents for high availability
- Optimized CI/CD pipelines and IaC, reducing global release cycles from weeks to under 3 days

Advanced Sterilization Products, Software Engineer, Irvine CA, USA October 2023 - December 2024
Tech Stack: Python, ML, AI
- Developed a RAG chatbot leveraging Azure OpenAI and Cognitive Search for context-aware responses
- Engineered a Python validation framework for hardware/software integration for ASP Access Tech

EdPlus, Software Developer Assistant, Scottsdale AZ, USA August 2022 - October 2023
Tech Stack: C#, Node.js, AWS, Serverless, Python, MJML, Vue.js
- Engineered AWS serverless processes for automated email systems and large-scale file processing
- Led the development of two virtual reality software applications using Dream Scape SDK and Unity

HHAeXchange, Software Engineer, Ahmedabad, India December 2020 - July 2022
Tech Stack: C#, .Net core, kafka, Angular, SQL, PostgreSQL, AWS, CI/CD
- Optimized **kafka** pipelines, resulting in 30% faster processing and 15% lower server costs
- Led a team of 4 to deploy a .NET Core app processing 10k+ daily files with high consistency
- Designed a sharding strategy to partition **SQL** databases using event-based pub-sub architecture
- Revamped **Angular** cash payment module for 35% efficiency boost and enhanced user experience
- Expertly integrated **AWS** Secrets Manager and CloudWatch with structured logging in .Net Core

PROJECTS

Stance Detection | Python, BERT April 2023
- Led team in Climate Stance detection, analyzing tweets to identify causes of shifts
- Visualized decision-making process by highlighting influential words to build user trust in tweet stance prediction and developed engaging website

Edge Computing | Java, Python, TensorFlow, Flask September 2022
- Designed parallel computing solution, reducing server load by achieving 50% reduction in latency
- Optimized nearby device utilization for enhanced image digit prediction with distributed machine learning model

Object Detection using AWS | AWS, Python, AWS S3, Flask Jan 2023
- Implemented the web tier utilizing Flask, and application tier on EC2 infrastructure for object detection
- Configured the application tier to auto-scale on EC2 instance in response to changes in the size of the **SQS** queue

Augmented Reality And Its Use Case | C#, AR Core, Ar Tool Kit, Unity3D June 2020
- Devised and deployed AR/VR experiences, resulting in a 30% increase in festival engagement
- Designed face filters, live books, and games, leading to a 40% boost in festival attendance
- Delivered an immersive treasure hunt game, resulting in a 50% increase in interactive experiences
